Attika expands the successful customized-concept

The customized-concept from a t t i k a includes six different paint colours and now seven elegant handle designs.

The success story of the a t t i k a customized-concept continues. The colour palette includes black, platinum, mocha, nickel, white and now sand. The warm cream colour puts the fire centre stage at all times and gives the stove a timeless and elegant look.

The new oak nature handle adds even more naturalness to the living room. Not only does it provide an aesthetically pleasing addition, its material is also impressive. Oak wood is durable and rustic. The wooden handle harmonises perfectly with different stove colours and creates a harmonious overall look.

With the two extensions, the customized-concept from attika currently offers six modern paint colours and seven elegant handle designs. The customized-concept also allows for numerous customisations around the large firebox: Different door and window options put the fire centre stage in the best possible way. Matching side benches turn the stove into a customised piece of furniture.

In addition to visual features, you can also choose from a wide range of options for the technical details, depending on the stove model. Fans of classic fire culture can regulate the air supply independently. If you want to leave this to the technology, choose a stove with the automatic CleverAIR™ or ElectronicAIR™ functions, which independently control the optimum air supply. Additional heat-storage modules© or a 360° rotating console can also be installed on request.

The concept is not only available for the VIVA L, NEXO, CARO and MAX 600 stove series, but also to a lesser extent for the PILAR, Q-BE, Q-BE XL, Q-TEE 2, Q-TEE 2 C and JUNO L stoves. Thanks to the customized-concept, the stoves can be adapted to any requirement. There are over 10,000 possible combinations. Using an online configurator or samples from a dealer, customers can put together their stove from various components to best suit their individual interior style.
